Overlay Map - Parx Racing (PRX)

September 30, 2026

The Overlay Map is the complete customer-facing dashboard. Relative shading shows structural strength; Model Odds supplies the internal fair price. Chaos and Field Risk are calculated independently of COMP.

Legend	Darker metric cells = stronger field-relative values.	VALUE = Morning Line divided by Model Odds; above 1.00x indicates a pre-race overlay.
ML	Morning-Line Alert	Morning Line implies a win probability at least 200% higher than the model (3x the model probability), regardless of horse metrics.
WPH	WP-HIDDEN	Alpha Signal finds strong WP evidence concealed by weaker apparent speed, with independent supporting evidence.

Strength Signature Legend		
MARKER	STRENGTH SIGNATURE	BRIEF EXPLANATION
CF	Class-and-Figure Strength	Triggers when recent BRIS average is in the field's top third, Prime Power is top two, and pre-signature Model Odds are at least 1.5 times the Morning Line.
CC	Course-and-Condition Specialization	Triggers after a top-two finish at the same track/surface/class, with at least 2 wins from 3 track starts and 2 wins from 2 distance starts.
WM	Current Winning Momentum	Triggers when the horse won each of its two most recent starts.
PRG	Same-Condition Progression	Triggers after a top-three finish at the same track/surface/class, supported by a top-third BRIS average or top-three LP.
CRI	Class-Relief Surface Improvement	Triggers when the horse won two starts back and today's claiming price is no higher than the highest claiming price in its last two starts.
BF	Balanced Finishing Support	Triggers when the CRI conditions are satisfied and LP also ranks among the field's top three.
HD	Historical Dominance	Triggers with at least 3 comparable same-track/surface/class starts and all ITM; the broader track record must have at least 4 starts, 2 wins, all ITM, and a history-support score of at least 5.

Display rule: A marker appears only when the horse satisfies the listed eligibility conditions and the corresponding signature is confirmed in the Track-IQ audit.

PARX RACING - Alpha Signal

September 30, 2026

Method: Grade evaluates signal quality, while Value Ratio evaluates price. Consider At uses Model Odds from the Track-IQ final audit as the minimum acceptable win price; a Pass reflects signal quality, not a different fair price.

3	#7 COACH CLINT	20-1	79	4.44	4.5-1+	80	C - Watch - DRF

Projected race shape (hot pace): First quarter mile: #7 COACH CLINT has an early-position case (E/P style); in a prior 8.5-furlong dirt race at Parx Racing, was within 1.5 lengths at the second call, then finished 13.5 back. **#8 VINO DOMINUS** is another modeled early presence; in a prior 8-furlong dirt race at Ellis Park, was within 0.13 lengths at the second call, then finished 17 back. **Second quarter mile:** #6 TEN PLUS TEN has the strongest modeled middle-pace stamina; a recent 7-furlong dirt race at Parx Racing does not establish this projected trip (E2 component share 47%). **Third quarter mile:** That middle-pace move must hold through the turn. **Fourth quarter mile:** #8 VINO DOMINUS has a leading modeled finishing profile (LP component share 12%). #8 VINO DOMINUS has the shortest model price; its unrounded price implies about 31% win chance. **Other evidence:** #8 VINO DOMINUS has a trainer/jockey pair with 35% wins from 51 starts in 365 days; #8 VINO DOMINUS has a Claiming trainer angle: 25% from 547 starts. **Risks:** #6 TEN PLUS TEN has a high SPD share driven by one unconfirmed comparable figure. Complete Profile. This runner combines one of the strongest overall evidence scores in the field with a well-balanced performance profile. Trainer angle — Claiming: 25% wins from 547 qualifying starters; ROI +0.18. 2-for-10 (20%) on today's surface. **Race-Shape Angle - Latent Strength Convergence (STRONG):** Vino Dominus pairs field-rank #1 WP (41.6%) with PRG, CRI strength-signature support and 7 supported finishing efforts. **DRF Angle — Back-Class / Historical Suitability:** back-class / historical surface ability; Dirt starts: 24% wins from 1001 starters; ROI +0.06; Routes: 21% wins from 388 starters; ROI -0.09. **Key Risk: Elevated Risk:** CV 14%.

#6 TEN PLUS TEN - 8-1 M/L - C - Watch -

Value Overlay. The model projects this runner at substantially shorter odds than the Morning Line, creating one of the strongest value discrepancies in the race. Recent BRIS average 68 ranks 1 of 6 and sits near the high end of this field's recent-speed range. 2-for-11 (18%) on today's surface. **DRF Angle — Back-Class / Historical Suitability:** first route start, sprint to route, major class/purse relief, back-class / historical surface ability. Finishing Risk: prior DRF running lines show a recurring failure-to-sustain pattern in 3 separate starts (gave way, tired). Other races may show successful late efforts, so this is an intermittent finishing-risk warning rather than a claim that the horse always quits.. **Key Risk:** recent speed figures are declining. **Elevated Risk:** CV 14%.

The projected stalking finisher position is suited to a hot pace, creating a coherent path to sit behind the pressure and finish past more exposed runners. **DRF Angle — Back-Class / Historical Suitability:** back-class / historical surface ability; recent close finish came despite trip adversity; Sprints: 25% wins from 634 starters; ROI +0.13; Dirt starts: 24% wins from 1001 starters; ROI +0.06. Finishing Risk: prior DRF running lines show a recurring failure-to-sustain pattern in 2 separate starts (faltered, gave way). Other races may show successful late efforts, so this is an intermittent finishing-risk warning rather than a claim that the horse always quits.. **Key Risk:** recent speed figures are declining. **Key Risk:** CV 16% signals substantial uncertainty.
